In technical terms,
it's an important release
of the Microsoft Exchange
Server platform.

In layman's terms,
it's important information
about your important
information.

If you're technical...

Or if you're not...

...this seminar is for you.

In today's world, people want anytime, anywhere – and anything – mobile access to email, voice mail, calendars, mobile phone data and more. Microsoft Exchange Server 2010, the leader in this technology, can save your company time, money and frustration.

So if you're an IT professional, or if you're NOT, plan to attend this educational, no-cost event.

SafetyNet

9:00 am – 12:15 pm **For anyone**

If you work with a small business and need life made simpler, join us to learn how Microsoft has created email software that can:

- Help your employees collaborate, effortlessly
- Protect your confidential business records
- Keep junk mail out
- Help you and your employees stay connected, even when you're not at your computer
- Organize everyone's calendar - no missed meetings, no schedule conflicts
- Make your business more efficient

It's that simple.

12:20 pm – 2:00 pm **For the tech gurus**

Microsoft Exchange Server 2010 allows you to cut costs and save time by optimizing your IT infrastructure.

Join us to learn how Exchange 2010 delivers:

- Increased OWA - compatibility with IE 7 & 8, Firefox 3 and Safari 3
- Flexibility to tailor your deployment and a simplified way to keep e-mail continuously available to your users
- A unified approach to high availability and disaster recovery
- Full-featured business messaging with Exchange ActiveSync for mobile users
- Role-based access control
- Enhanced sensitive-content e-mail control
- Built-in e-mail archiving, retention and discovery capabilities

And much more!
